GAMEPLAY FEATURES

QUICK GRAPPLES (ALL NEW FOR '07)

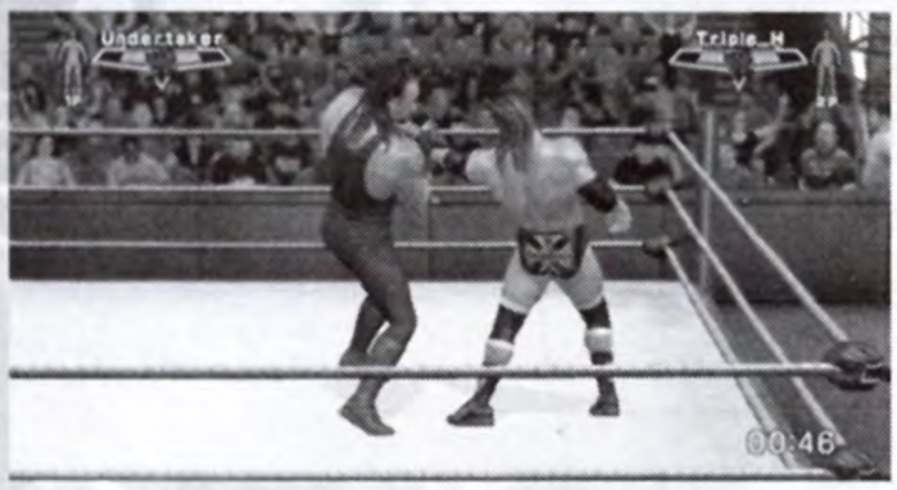
Quick grapples are difficult to reverse, low damage attacks that are performed free of a grappled state. Simply press the right analog stick ⬆, ⬇, ⬅, or ➡ to perform a different quick grapple attack. Each Superstar is equipped with four front and four rear Quick Grapple attacks. Quick Grapples are a great way to work over an opponent during the early minutes of a match. Each Superstars' Quick Grapple move-set can be edited in the Create A Move-Set option.

STRONG GRAPPLES (ALL NEW FOR '07)

Strong Grapple moves inflict more damage than quick grapples, but are also easier to reverse due to their slow movement. Unlike quick grapples, Strong Grapples can only be performed while in a grappled state. To lock your opponent in a grappled state, hold the R1 button and press the right analog stick ⬆, ⬇, ⬅, or ➡. Each Superstar is equipped with four different Strong Grapple holds within their move-set.

SUBMISSION GRAPPLE HOLD

Hold the R1 button and press the right analog stick ⬇ to lock your opponent in a submission grapple hold. Once locked in the grapple hold, press the right analog stick ⬆, ⬇, ⬅, or ➡ to perform four different Strong Grapple Submission moves.



CLEAN/DIRTY GRAPPLE HOLD

Hold the R1 button and press the right analog stick ⬆ to lock your opponent in a clean/dirty grapple hold. Once locked in the grapple hold, press the right analog stick ⬆, ⬇, ⬅, or ➡ to perform four different clean/dirty Strong Grapple moves.

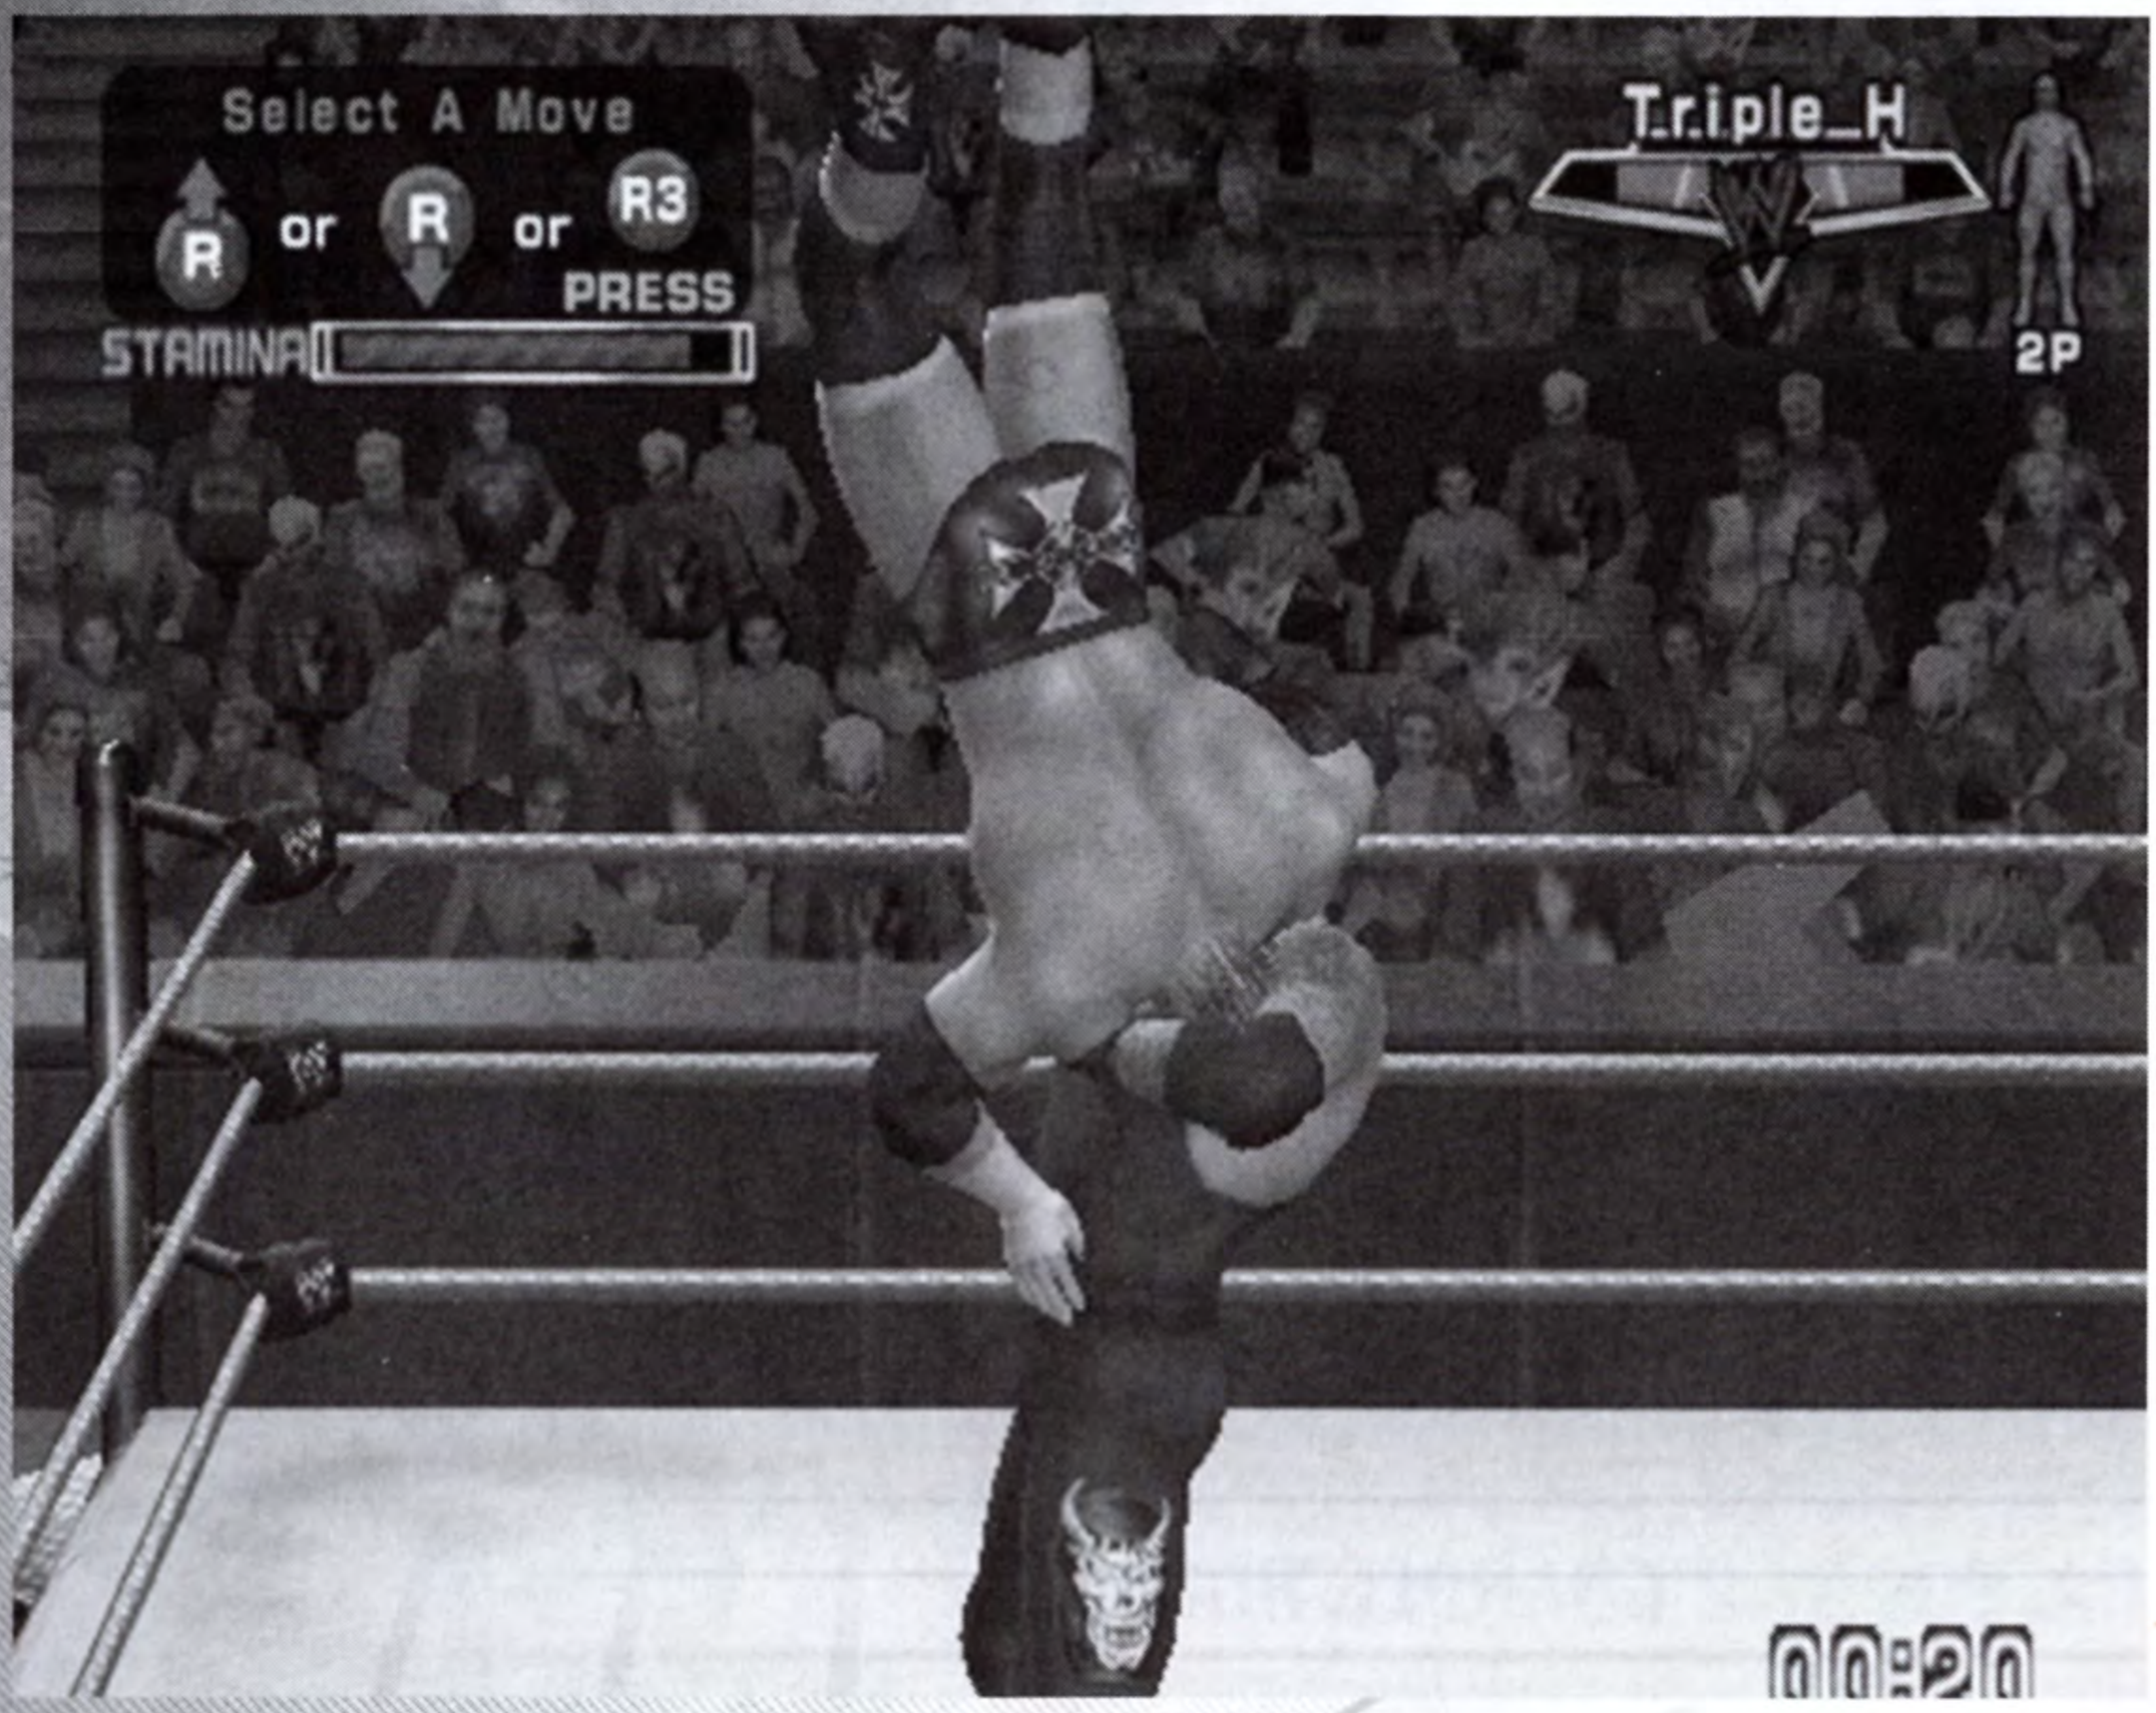
CATEGORY 1 GRAPPLE HOLD

Hold the R1 button and press the right analog stick ⬅ to lock your opponent in a Category 1 grapple hold. Once locked in the grapple hold, press the right analog stick ⬆, ⬇, ⬅, or ➡ to perform four different category 1 Strong Grapple moves.

CATEGORY 2 GRAPPLE HOLD

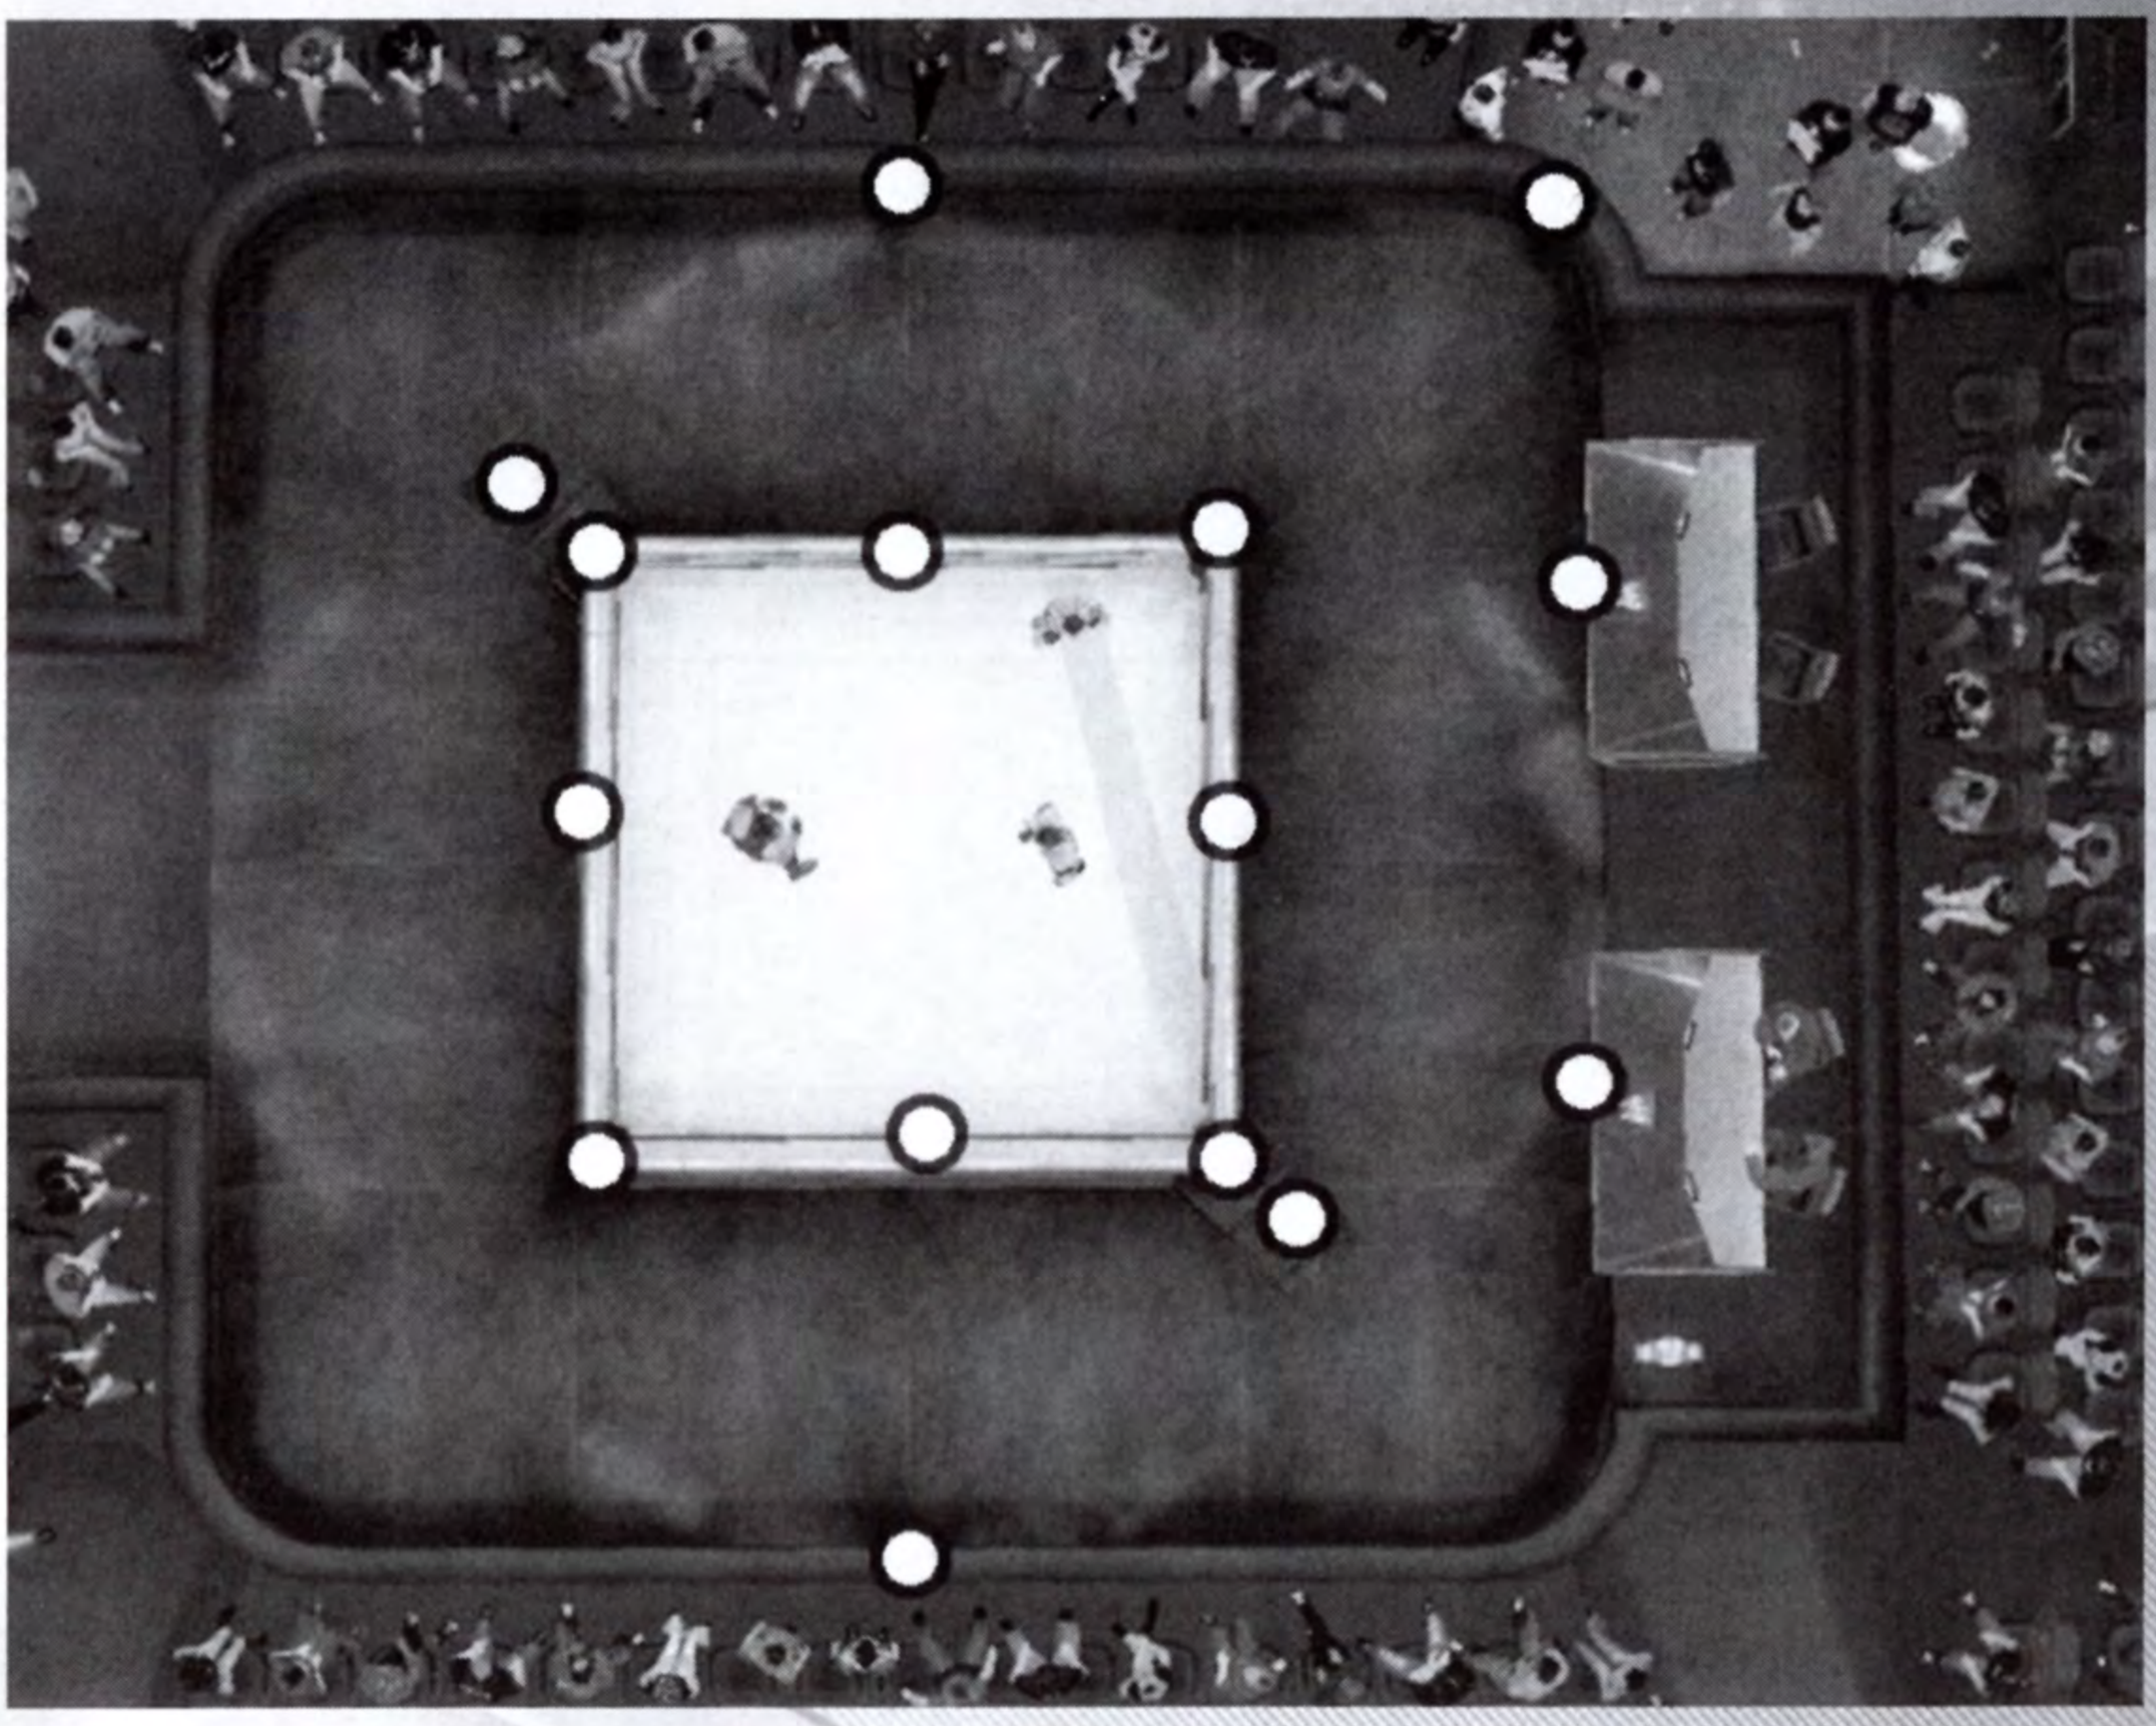
Hold the R1 button and press the right analog stick ➡ to lock your opponent in a Category 2 grapple hold. Once locked in the grapple hold, press the right analog stick ⬆, ⬇, ⬅, or ➡ to perform four different Category 2 Strong Grapple moves.

NOTE: Category 1 and Category 2 grapples can be edited in the Create A Move-Set option. Players can pick from a list of seven different grapple categories and assign them to their Superstar.



ULTIMATE CONTROL MOVES (ALL NEW FOR '07)

Ultimate Control Moves give players the freedom to decide when and where they want to lay the SmackDown on their opponent. To perform an Ultimate Control Move, you must first be in a grappled state. Once in a grappled state, press the R3 button to initiate the Ultimate Control Move. Follow the instructions along the Heads Up Display (HUD) to select a grapple move. After a grapple has been selected, press the right analog stick in the direction as indicated along the HUD. Each Superstar has four Ultimate Control Moves for each one of their four strong grapple holds.



ENVIRONMENTAL HOTSPOTS (ALL NEW FOR '07)

Sometimes grapples and strikes just aren't enough to put an opponent away. When standard wrestling techniques fail, it may be time to utilize the surrounding environment as a weapon against your opponent. Simply lock your opponent in a strong grapple and drag them toward any object in the environment to automatically trigger its hotspot situation. Move the right analog stick as instructed along the HUD to perform the appropriate grappling action. The diagram above contains some of the environmental hotspots spread throughout the ring area. Experiment during gameplay by dragging your opponent to different locations inside and outside of the ring to locate more environmental hotspots.

Stop Environmental Hotspot	◉ button during Environmental Hotspot
Perform special taunt	Directional button during Environmental Grapple (any direction)

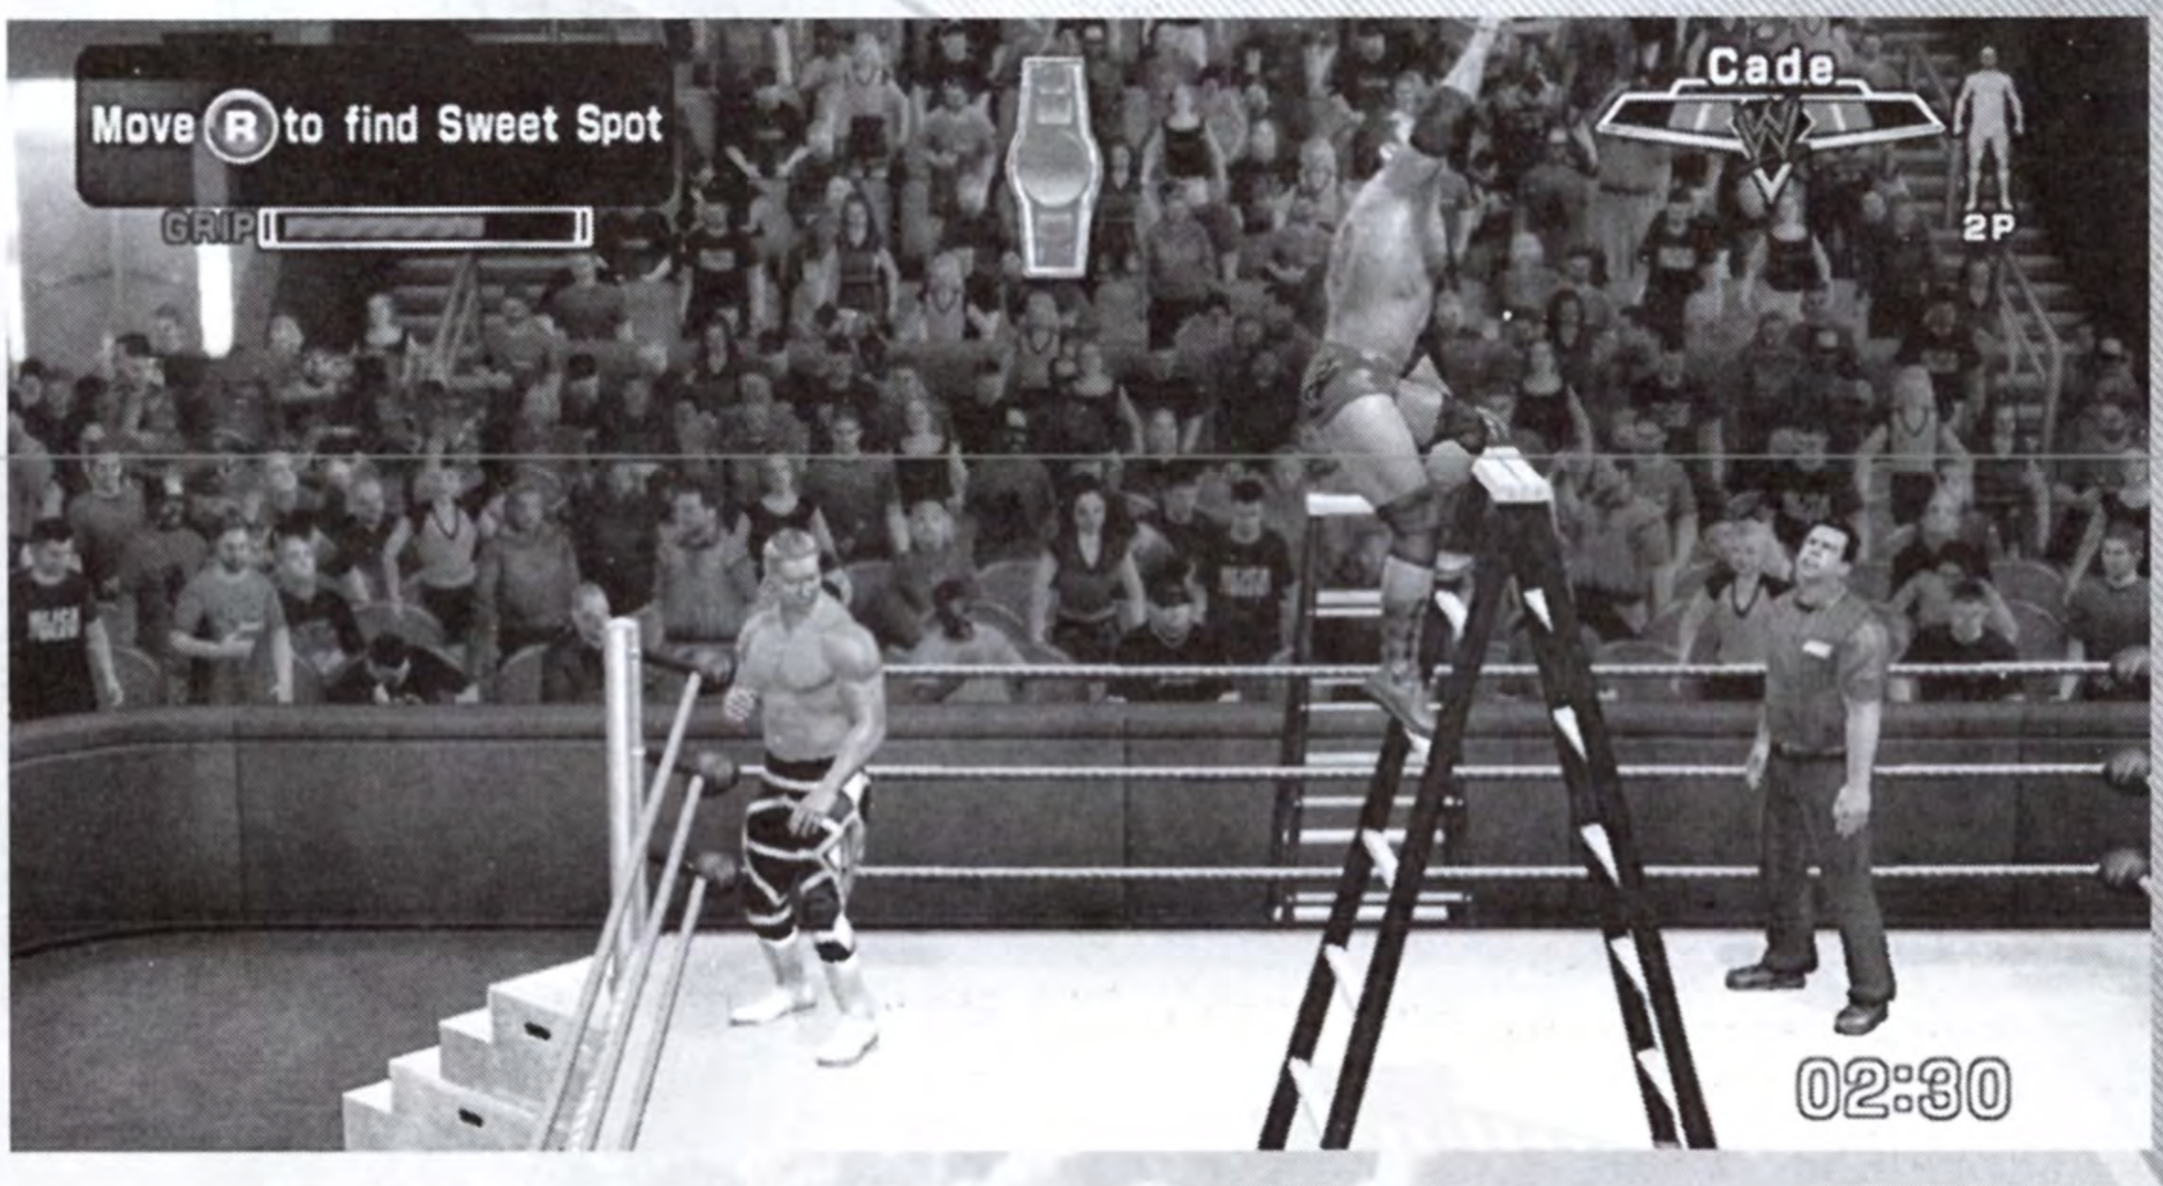
FIGHTING AREA IN THE CROWD (ALL NEW FOR '07)

When the fighting spills outside of the ring, continue the fight inside of the all-new Fighting Area In The Crowd. To access this new fighting area, simply Irish whip your hapless opponent into the corner barricade wall near the announcer's table. When your opponent is slumped against the barricade, move the right analog stick in any direction to clothesline your opponent over the barricade wall and into the crowd area. Once inside of the crowd area, fans can—and will—hand you a wide assortment of everyday items which can be used as weapons, such as crutches or umbrellas. You'll also be able to interact with the fans directly. Approach any fan holding up a sign and press the ⊗ button to take the sign from the fan and cheer along with him/her if you're a clean Superstar, or rip it in half and toss it to the ground if you're a dirty Superstar. The FITC area also contains environmental hotspots and backstage equipment, which can be used as weapons against your opponent. The diagram above contains a few of the hotspots available in the crowd area.

IMPROVED LADDER MATCH CONTROLS (ALL NEW FOR '07)

The Ladder Match has undergone a facelift in ***WWE SmackDown vs. RAW 2007*** and features all-new gameplay controls. The objective of the Ladder Match is to set-up a ladder in the middle of the ring, climb to the top and remove the championship belt suspended above the ring. Once you've ascended to the top of the ladder and are within reach of the belt, the left analog stick and right analog stick appears along the HUD. Press the left analog stick ⬆ to reach with your left hand and press the right analog stick ⬆ to reach with your right hand.

If you reach with the left analog stick and manage to grab the championship belt, the next step is to find the "sweet spot" by moving the left analog stick around. When the "sweet spot" has been found, the controller begins to vibrate slightly and the ladder gauge begins to pulsate. Hold the left analog stick in the "sweet spot" location in order to drain the ladder gauge. Once fully depleted, the championship is yours and the match is over!

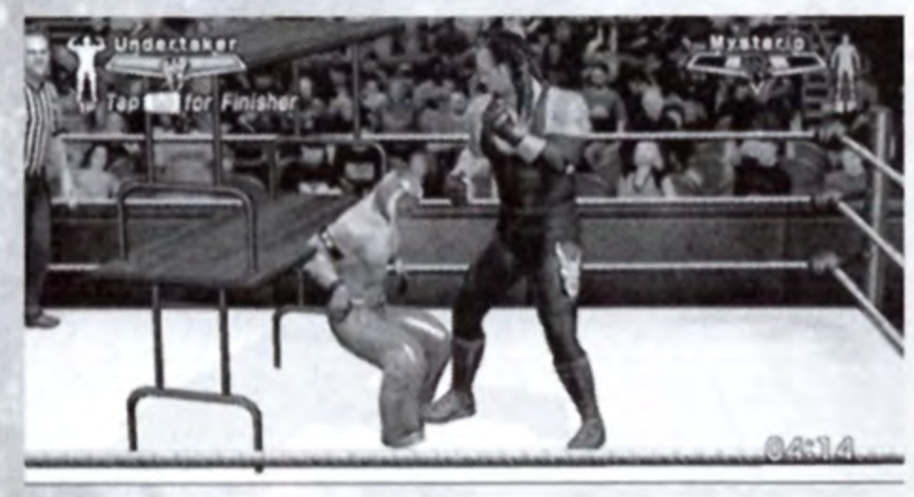


NOTE: The same controls apply when using the right analog stick to reach for the title. When the title is in hand, you would move the right analog stick around to locate the "sweet spot" and drain the ladder gauge.

Pick up ladder	⊗ button
Set-up ladder (while holding ladder)	⊗ button
Drag a set-up ladder	Hold ⊗ button (while standing to the ladder's side)
Release ladder	⊗ button (while dragging ladder)
Lean ladder horizontally against an already set-up ladder	Left analog stick (towards ladder) + ⊗ button (while holding ladder)
Run up leaning ladder	△ button (when a ladder is leaning against another ladder)
Push ladder over	⊗ button (when two opponents are on top of a ladder)
Drop safely to the mat	⊗ button (while hanging from item)

IMPROVED TABLES MATCH CONTROLS (ALL NEW FOR '07)

The Tables Match has also undergone a facelift and features an all-new gameplay mechanic as well as controls. To win the match, you must slam your opponent through a wooden table, but before you'll be able to slam an opponent through a table you will need to meet two requirements. First, you will need to store a finishing move icon. Once a finishing move icon has been stored, you will need to turn at least one limb on your opponent's limb damage meter red. Next, Irish whip or drag your opponent toward a set table to make them lean against it. While your opponent is dazed press L1 to perform the table finishing move to slam them through the table.



Pick up table	⊗ button
Set up table (while holding a table)	⊗ button
Drag table	Hold ⊗ button while standing next to table
Release table	⊗ button (while dragging table)
Double Stack Tables	While holding a table walk into a setup table and press the ⊗ button.

MOMENTUM

As you compete in the match, your Superstar gains momentum with each strike and grapple that he/she lands. When you fill your momentum meter up, you earn the ability to perform that Superstar's finishing move or store it for later use.

STAMINA

Throughout the course of a match, Superstars accumulate fatigue and their stamina meters slowly begin to deplete. Performing strenuous in-ring activities such as running, grapple moves and strikes cause each Superstar's stamina meter to drain. How fast depends on each Superstar's stamina attribute rating, which can be viewed on the Superstar Select screen. Superstars with a high stamina rating are slow to lose stamina and fast to regain it. Superstars with a low stamina attribute are quick to lose stamina and slow to gain it back. Stamina can be regained manually by pressing and holding the ◉ button. Stamina also automatically increases when being inactive in the ring.

PLAYING POSSUM

Brute strength alone cannot always carry you to a victory inside the WWE ring. Using your quick wits can often pull you out from the doldrums of defeat. Fake an injury to lure in your opponent and catch them by surprise by securing them in a quick and powerful pin. While lying on the mat, and in possession of a stored special, press and hold the ⊗ button and successfully counter your opponent's strike or grapple attack by tapping either the L2 or R2 button. If timed correctly, you'll catch your opponent off guard and will be able to capture him in an incredibly powerful pin that's hard to escape.

STEALING TAUNTS

Further humiliate your opponent by stealing their signature taunt! With a stored finishing move icon, hold the L1 button and press any directional button to steal your opponent's taunt. If the stolen taunt is performed without interruption, it completely drains your opponent's momentum meter.

GENERAL MANAGER MODE

Take control of *SmackDown* or *RAW* as the General Manager in this all-new game mode. Can you turn a profit in the world of sports-entertainment? This is your shot. Control General Manager mode via the following menu:
